Description

OVERVIEW

Proper roof ventilation helps ensure the increased performance of your roof. VentSure® Ventilation products can help prevent damage and premature aging caused by attic moisture in the winter and excess heat in the summer. A balanced air ventilation system consists of both intake and exhaust vents, which allow the proper flow of air through the attic.

- All aluminum construction for additional durability
- Fully screened for first line of defense against insects
- Predrilled holes for easy installation
- Colors: Mill and White
